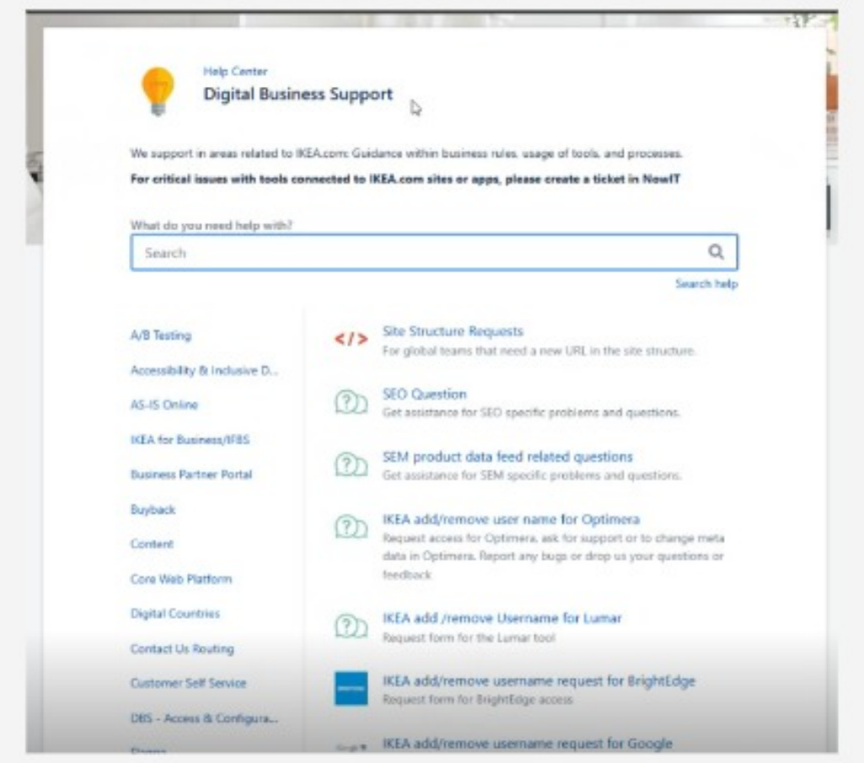
Co-worker steps

Request | **Implement & submit** | **Validation** | **Deployment**

Step description

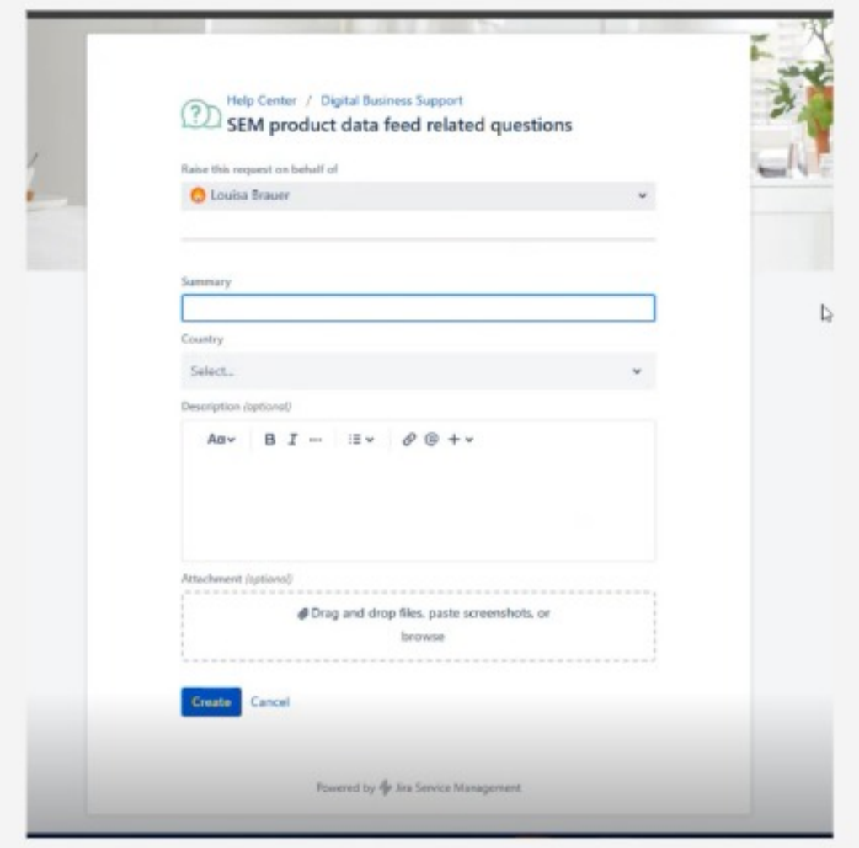
Request

Market/agency submits request



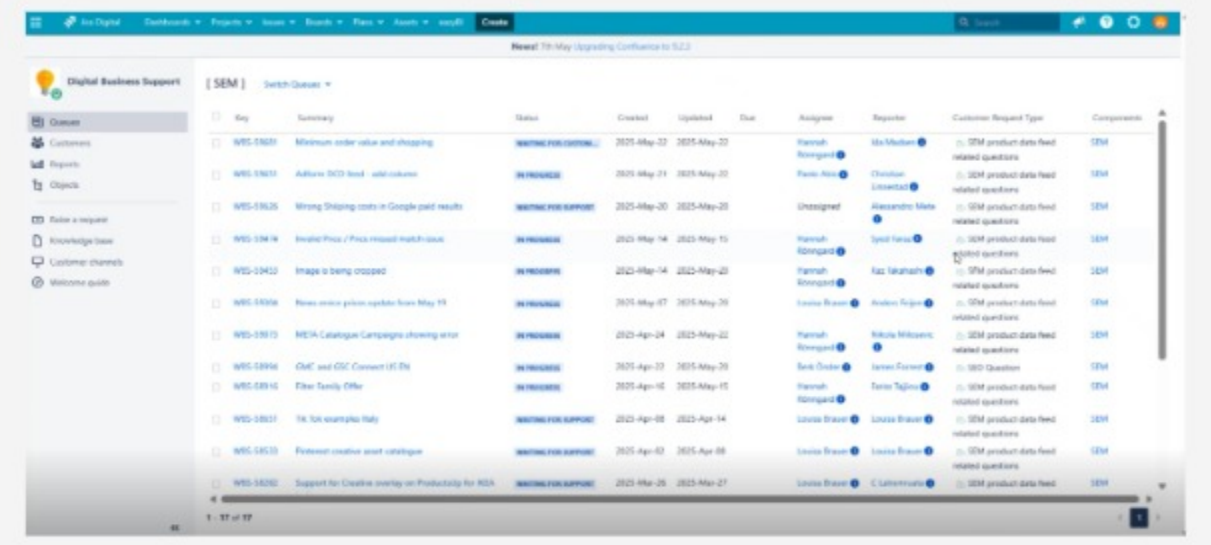
Ingka Jira Service Desk - Help centre for digital support.

P1. Missing categorised information starts from the requests. Limited categorisation for the requests reflects missed information in Jira tickets for SEM specialists.

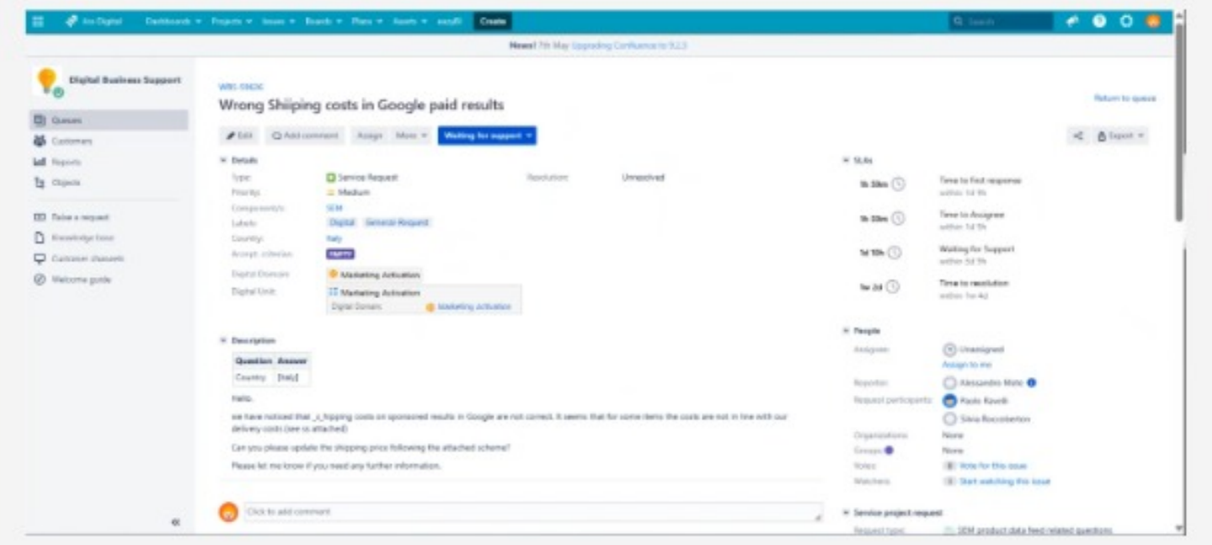


Ingka Jira Service Desk - To Submit requests related to SEM product data feed.

Assign request



Jira - Incoming tickets Overview

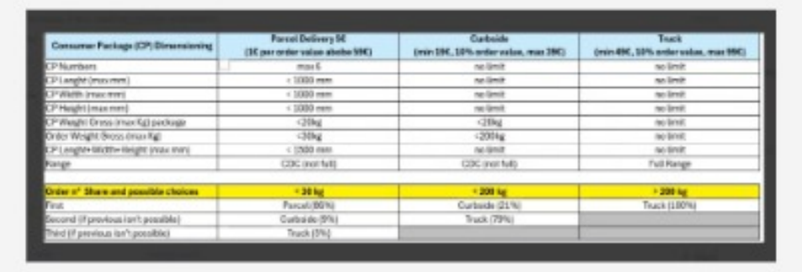


Jira - Ticket details, descriptions & attachments

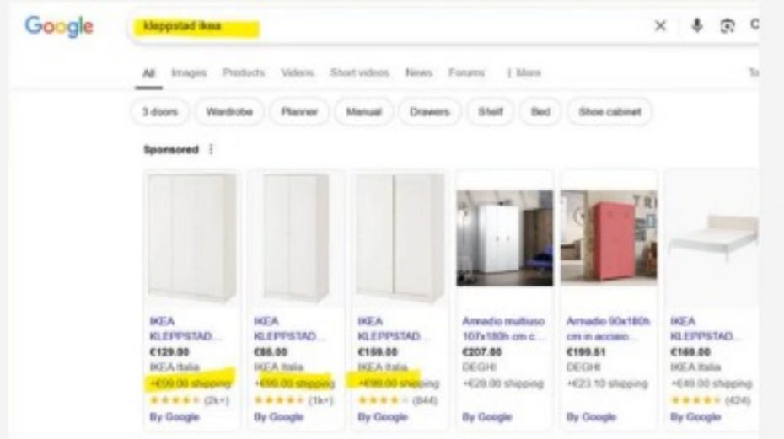
Implement & submit

Clarification

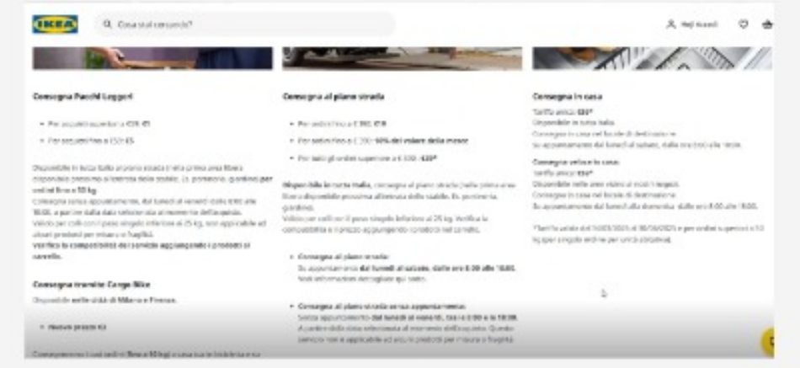
P2. Just images – unable to copy text for comparison or pasting, so more manual work is needed.



Information **screenshots**



Google SERP - xxxx

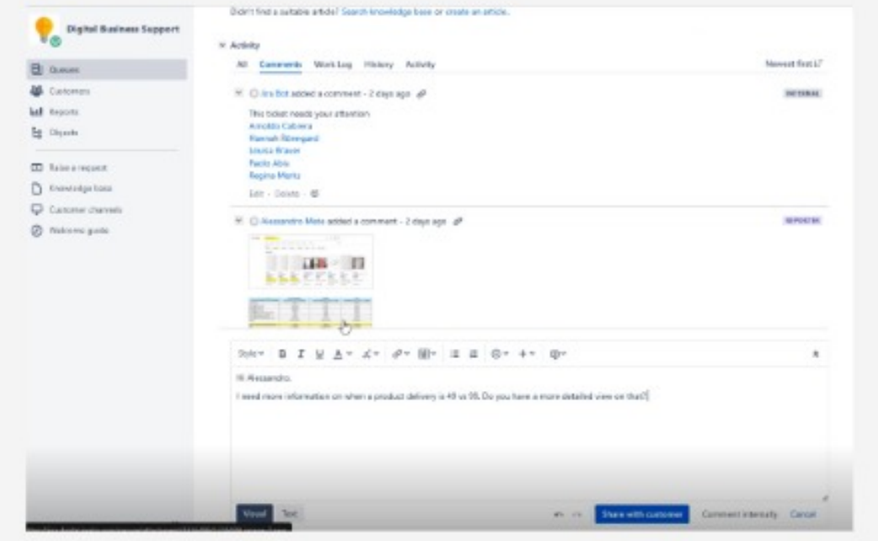


Ikea.com - xxxx

This is to clarify the request by comparing the provided data **screenshots** with **Ikea.com** and the **Google SERP** view.

P3. Has to switch in between different screens includes jpeg images to compare the values for clarification.

Information Request

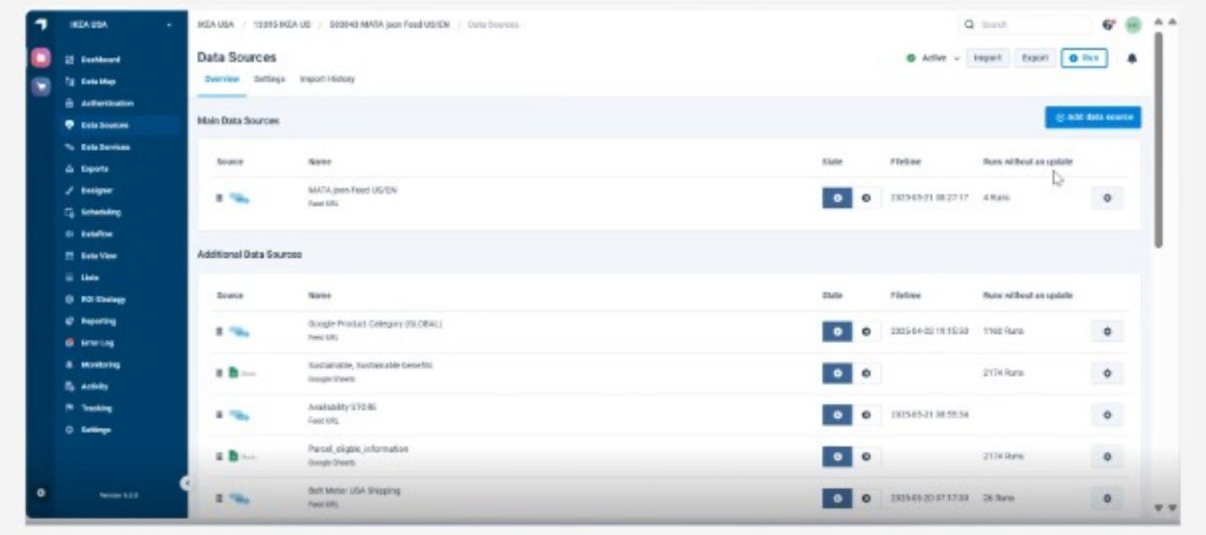


Jira -To further clarify the request

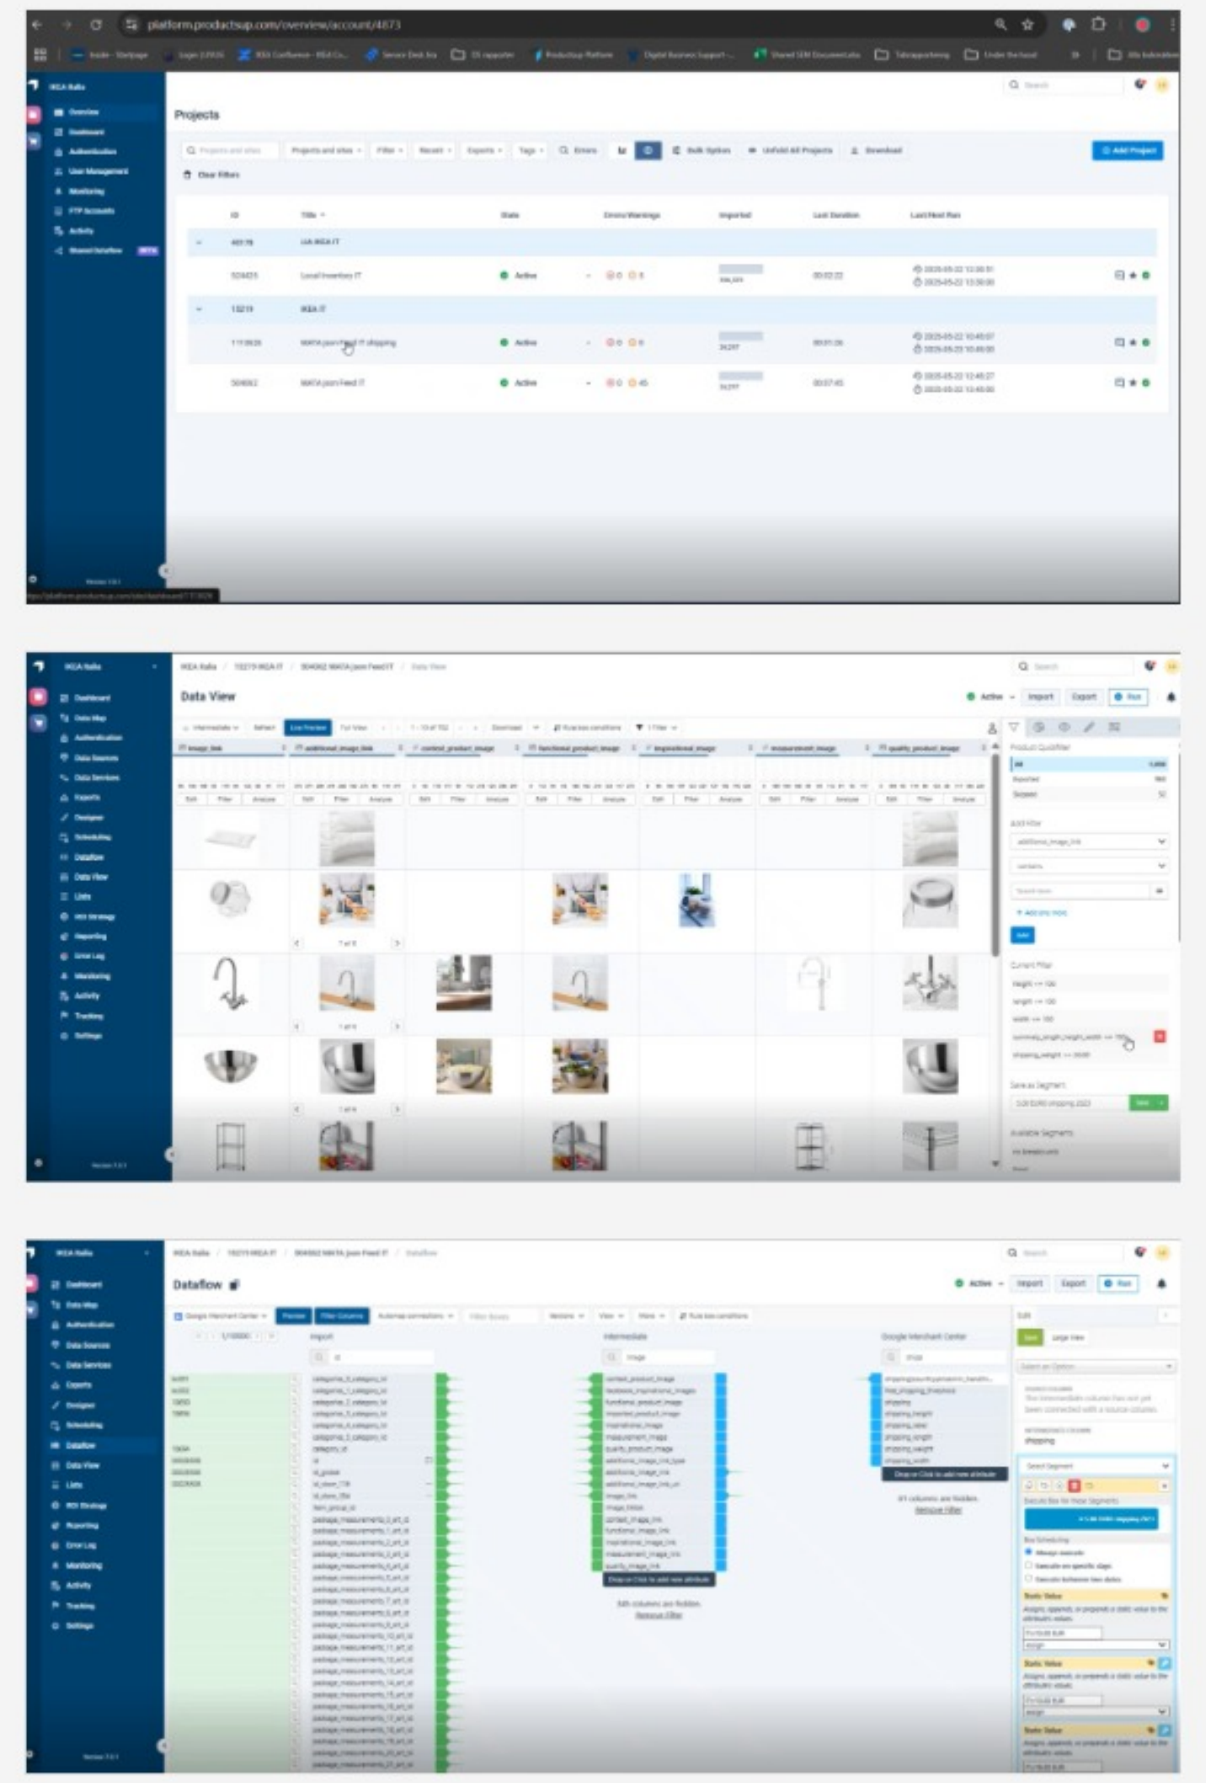
Update in ProductsUp and Google Merchant

P4

- *Additional product performance or insight data (like profitability, stock overage, demand signals) is not in the original JSON from Optimera.*
- *So SEM teams manually track this using **Google Sheets**.*
- *This file is then uploaded as an **"additional data source"** in Productsup.*
- *Result: Slow, fragmented, and unscalable process.*

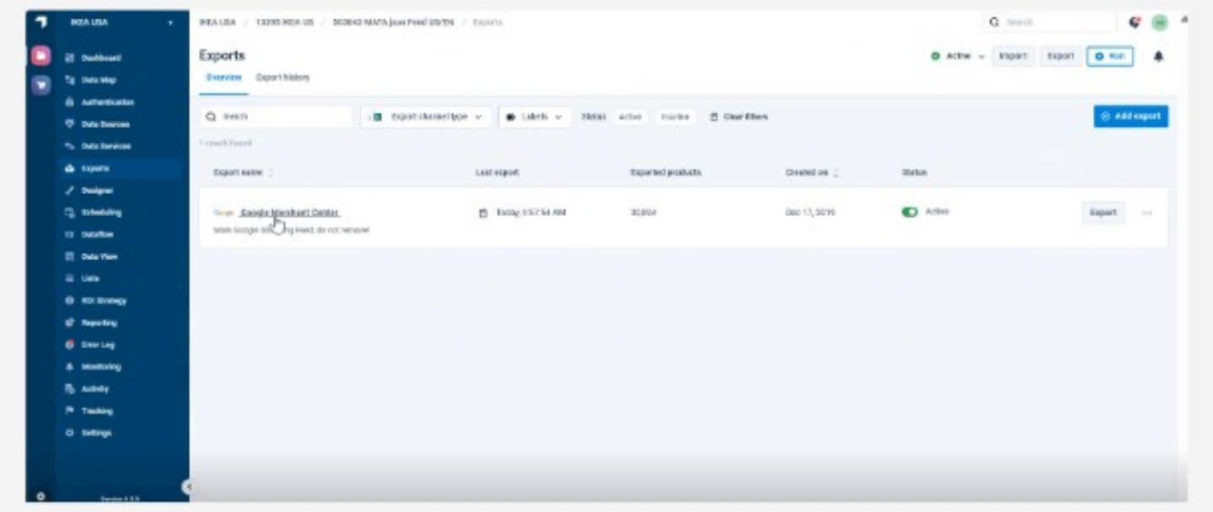


ProductsUp - For adding Main data sources & additional ones

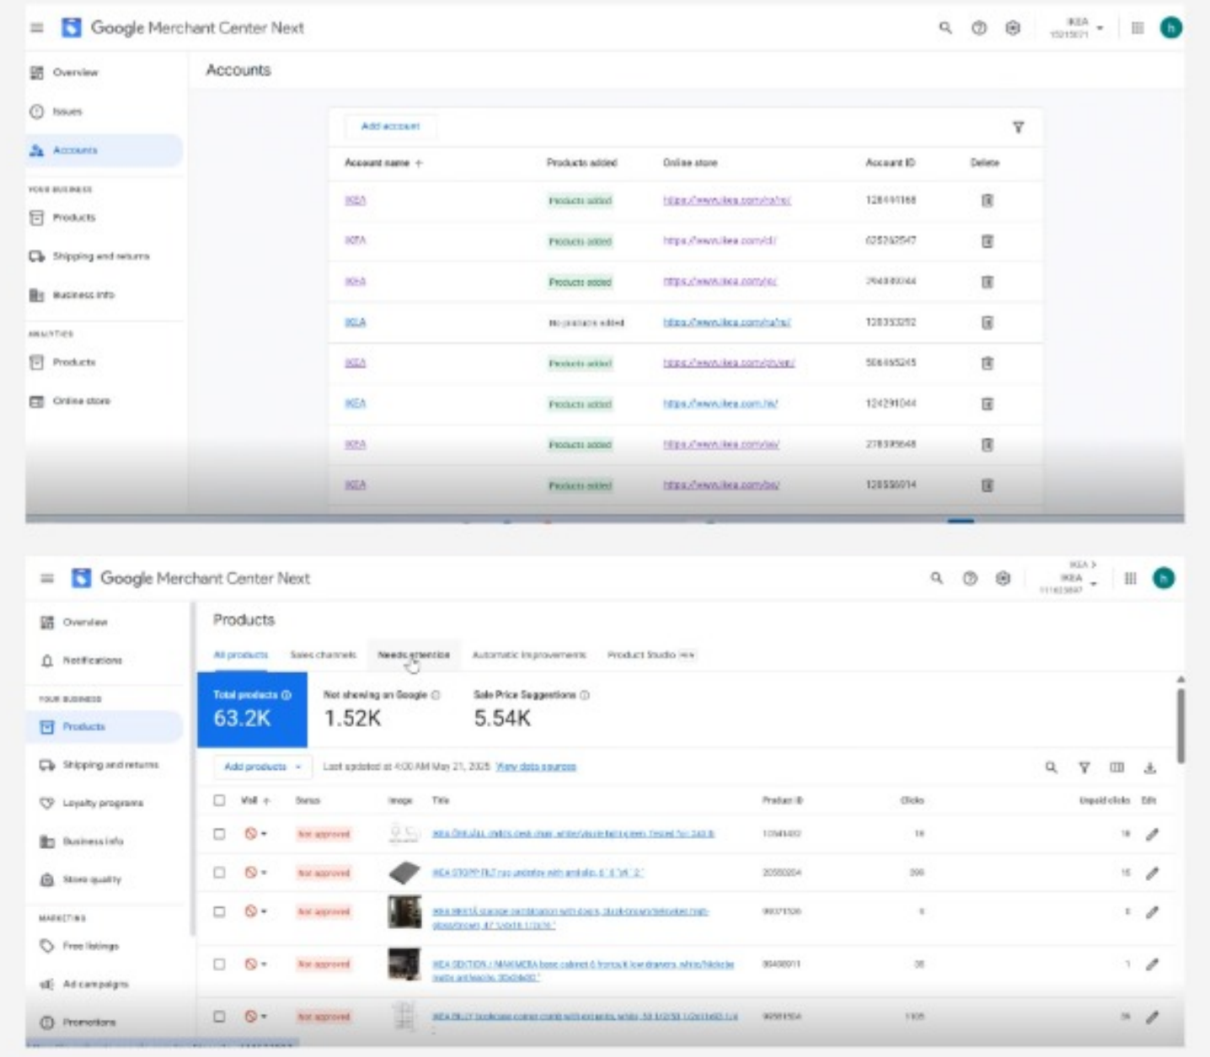


ProductsUp - To standardize and clean product data to meet channel-specific requirements (e.g., Google, Facebook).

*P5. Local teams with **editing access** to Productsup made incorrect changes, causing **feed failures** across markets during a weekend.*



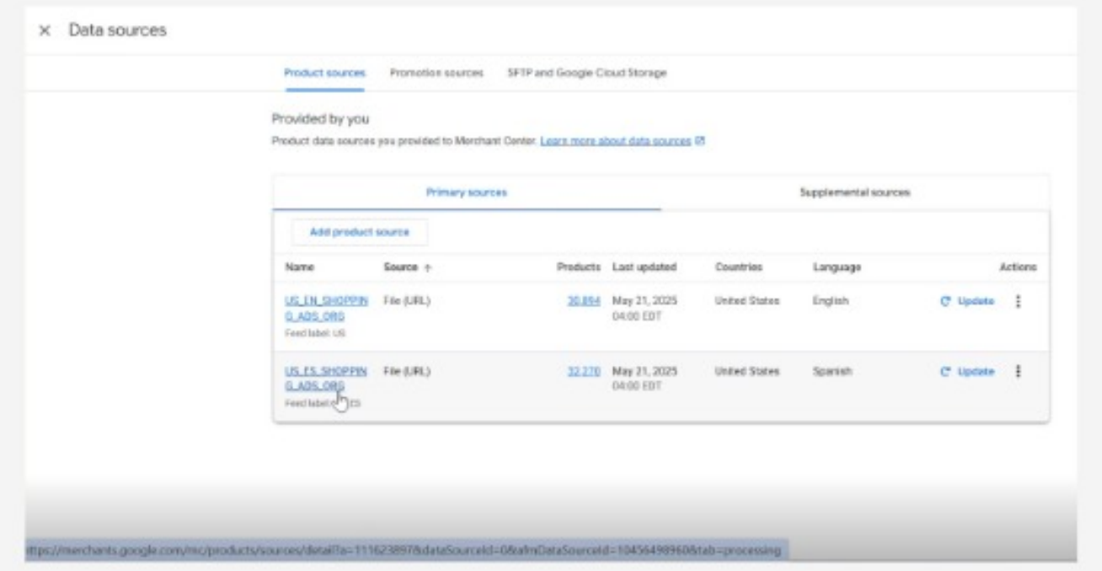
ProductsUp – Export the cleaned product feed and upload it to **Google Merchant Center.**



Monitor feed health and fix issues using diagnostics in **Google Merchant Center.**

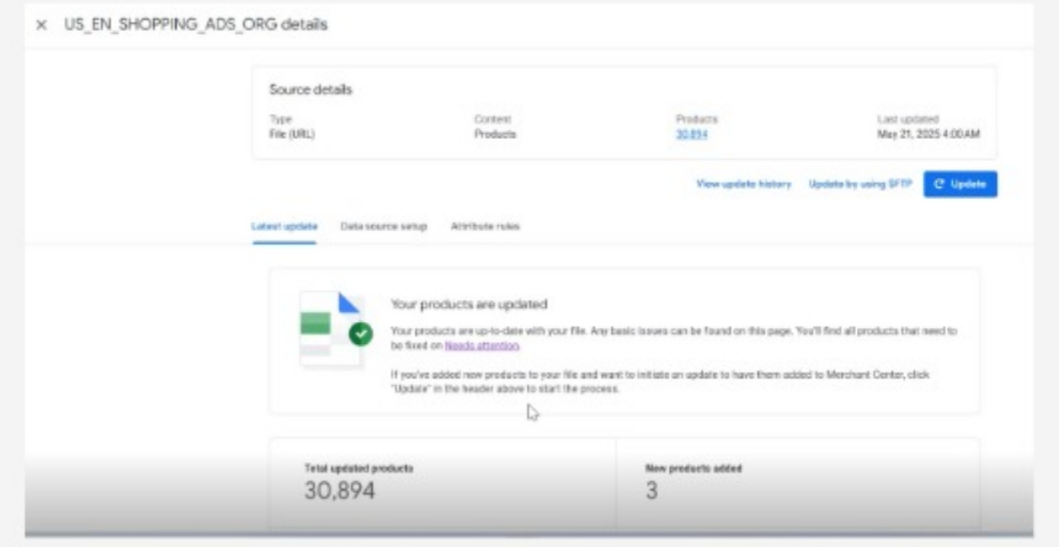
Validation

Submit for approval

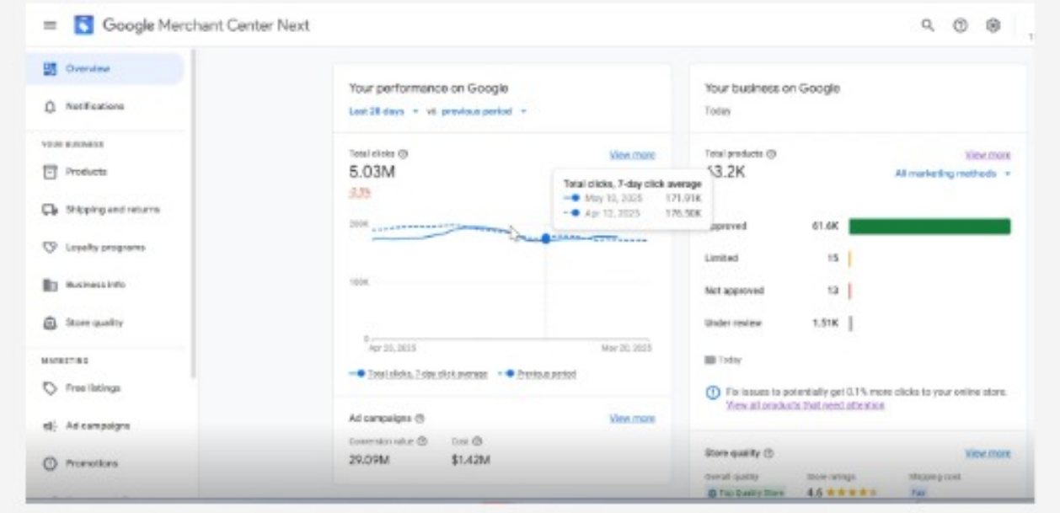


Google Merchant Center – Upload the main data source using the TXT feed exported from ProductsUp.

Health/Approved



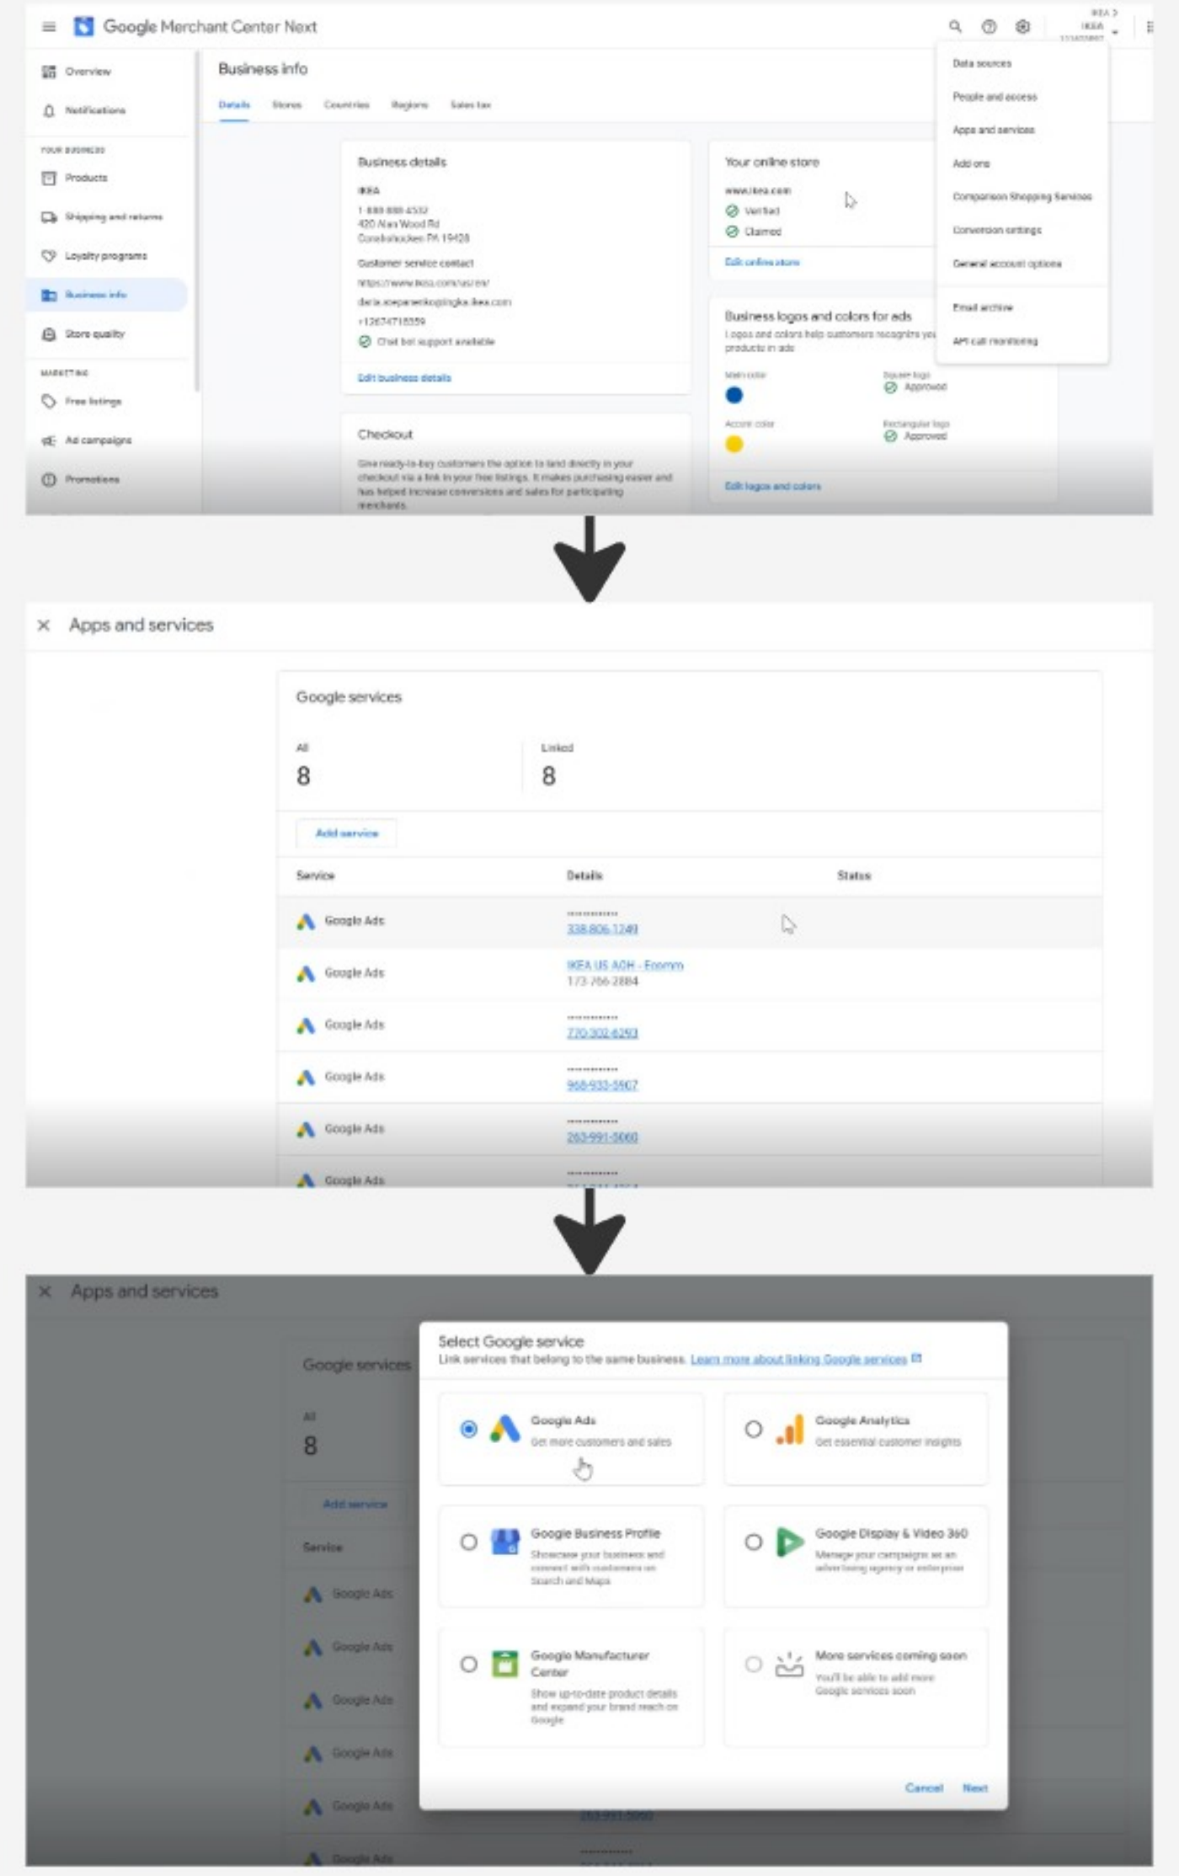
Google Merchant Center - To check products are approved



Google Merchant Center - Approved products overview

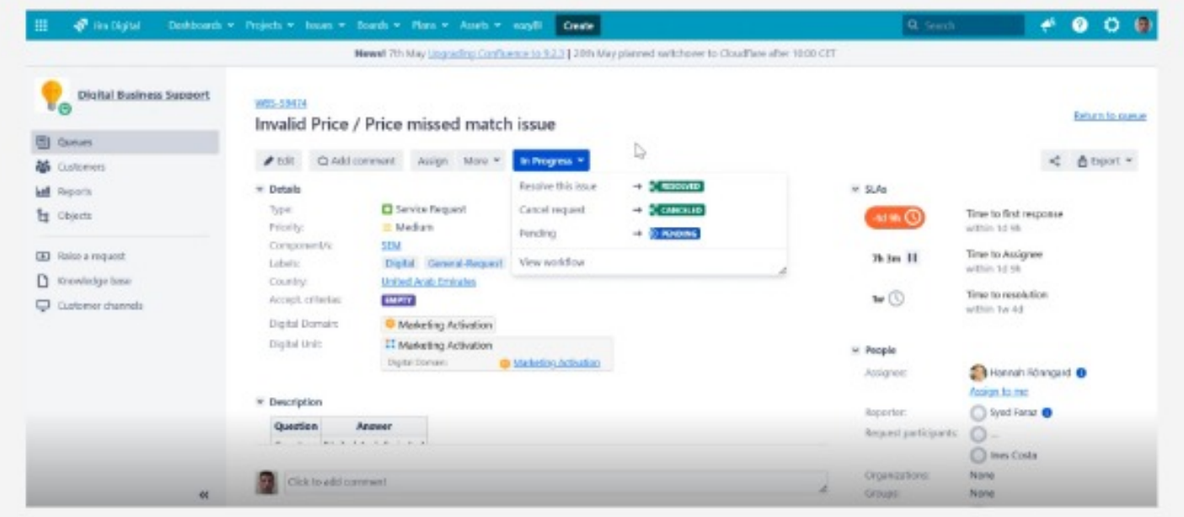
Deployment

pushing to ad platforms



Google Merchant Center - Pushing Approved products to **Google Ads** platform

Resolve ticket



Jira - Mark ticket as resolved
